

Recreate, Restore, Regain

Recreate, Restore and Regain your credibility

Welcome to the website of 3R Resources Financial, Inc. We are a California based private investment firm located in the San Fernando Valley. We are in the business of acquiring charged off credit card debt at a steep discount and collecting those assets by placing the portfolios with highly qualified third party collection agencies.

Our mission is to help our customers/debtors Recreate, Restore and Regain their credibility, to help our investors make secure and high profit investment returns.

Opportunities

There is a tremendous mismatch between the growing availability of charged off loans and the diminished capacity of the industry that will allow extraordinary opportunities to carve out a very profitable niche. The over-supply of charged off loans has driven down the acquisition cost and thus has created an unusual and highly profitable economic opportunity. Even though market factors have driven down the purchase price of these assets the profit margin between cost and recovery has remained the same at as much as three to one.
